

INLAND WETLANDS AND WATERCOURSES MAP

TOWN OF PLAINVILLE, CONNECTICUT

Legend

-  Waterline
-  Waterbody
-  Wetland Soil

THIS MAP IS FOR INFORMATIONAL PURPOSES ONLY

This map of wetlands and watercourses entitled "Inland Wetlands and Watercourses Map, Town of Plainville, Connecticut" delineates the general location and boundaries of inland wetlands and the general location of watercourses.

The boundaries are depicted for reference and planning purposes only. Wetlands and watercourse designations shown on this map are based on information obtained from a variety of historical map sources including USDA maps, site surveys and local and state GIS data.

In all cases, the precise location of wetlands and watercourses shall be determined by the actual character of the land, distribution of wetland soil types and actual location of waterbodies and/or watercourses. Applicants are strongly encouraged to obtain a report from a soil scientist accompanied by mapping of appropriate detail in order to provide the Inland Wetlands and Watercourses Commission with sufficient information to render a decision. Failure to present sufficient information in adequate detail may result in the denial of any application.

Actual location of wetlands and watercourses may only be determined by a Certified Soil Scientist.

The parcel layer was created in 2014 by New England Geosystems, Inc.

ADOPTED NOVEMBER 4, 2015 - EFFECTIVE DECEMBER 1, 2015
